

CHARTER FOR A NEW WORLD

We, the representatives of humanity, in the name of uniting people of good will through friendship and cooperation, hereby declare our shared aspiration to preserve peace among nations, protect and enhance the achievements of human civilization—its spiritual, cultural, and historical values—as well as the natural wealth of our planet.

Recognizing the primary direction of humanity’s evolutionary development as the ascent to a qualitatively new stage of progress, and fully aware of the significance of contemporary challenges, we commit ourselves to set the right course for the future, outlining the contours of a New World. We proclaim the following principles as the foundation of our collective coexistence on this planetary scale:

1. We recognize the necessity of consciously uniting our efforts to realize a peaceful and bright future and to build a harmonious present, as advocates of constructive civilizational progress.

2. We support public, state, and peacekeeping initiatives, as well as actions by all forces of good, aimed at establishing a New World based on shared fundamental values, spiritual and ethical foundations of life, and the conscious unity of peoples.

3. Regardless of our beliefs, national, religious, or state priorities, we acknowledge the unity of all the world’s peoples, as well as their personal rights, statehood, freedoms, languages, beliefs, traditions, customs, culture, and ethnic authenticity.

4. We welcome progressive, humanistic, and rational methods and measures for resolving conflicts of any kind, which do not restrict political, social, or religious rights and freedoms, or the people’s choice in sovereignty and self-determination.

5. We strive to strengthen the foundation of our lives by fostering and universally establishing an atmosphere of spiritual unity, trust, mutual understanding, mutual assistance, justice, and benevolent cooperation among peoples.

6. In our life activities, we are guided by universal norms of humanity and a moral duty to our ancestors and future generations.

7. We understand that shaping a New World requires conditions where economic and ethical-moral relations equally influence the civilizational process—conditions enabled by human resources, the intellectual potential of peoples, expressed through international development projects and socially significant programs that contribute to preserving peace, the planet’s ecosystem, and biological life.

8. We believe that international ties serve as a guarantee of the world’s future, shaping its sustainable development in a constructive direction and enabling qualitative renewal.

9. We affirm the passionate force of Love, Goodness, Light, Beauty, and the unshakable and eternal Laws of Life as the principle of universal humanization—a new vector for civilizational development.

10. We affirm our determination to act and support one another in achieving these goals, creating a New World of Conscious Unity—a concept based on ideas of interconnectedness and harmony among people, society, nature, and the cosmos.

On these foundations, we, the free peoples of the Earth, are ready to cooperate with all nations, ethnic groups, people of good will, public institutions, and movements dedicated to preserving peace, humanizing interpersonal relations, and promoting comprehensive processes of global renewal while safeguarding the civilizational and spiritual achievements of humanity.

Acknowledging all these principles, we raise our voices for a future founded on respect and harmonious coexistence among peoples in a multipolar world, driven by the collective power of our shared consciousness—the All-Human Community.

The future begins now!
